

I just wanted to write and let you know that XM Radio provides a great service with all of its channels. The newest addition of the traffic and weather from around the US is such a benefit. I just came back from a trip to Miami last week and listened to the traffic on the radio a week prior just to get an idea of what major routes get backed up during the time of my visit. It worked! It is such a great feature please reject the petition. It's a benefit we pay for in our subscription....don't take that away.
